[Portfolio](#) | linkedin.com/in/ahmaddhanisetiawan | Kota Jambi, Jambi, Indonesia

Fullstack Developer with experience building end-to-end web applications that solve real operational problems. Developed systems featuring session-based transactions, multi-level approval workflows, gamified membership, and real-time monitoring to replace manual processes and improve business efficiency. Skilled in designing RESTful APIs, implementing role-based access control, managing relational databases, and building responsive user interfaces using React and Laravel.

EXPERIENCE

PT Affan Technology Indonesia (Parto.id)

Jul 2025 - Sep 2025

Frontend Developer Intern

- Developed a mobile attendance history feature using React Native and Axios, integrating with REST APIs
- Implemented date-based filtering (monthly & yearly) with visual status indicators (present, late, sick, absent)
- Built a detailed attendance view including check-in/check-out timestamps, photo evidence, notes, and leave information
- Collaborated in an Agile Scrum environment, participating in stand-ups, sprint planning, and sprint reviews.

PROJECTS

Fishing Management System (Thesis Project)

Feb 2026 – Apr 2026

Fullstack Developer

Tech: React, Laravel 12, MySQL, REST API, Laravel Sanctum

- Built a session-based check-in and checkout system supporting QR-based member identification and walk-in guest flows, replacing manual paper-based recording
- Developed a multi-variable POS checkout engine handling tier-based discounts, voucher redemption, deposit settlement, and price snapshotting per transaction
- Designed a gamified membership system (Bronze–Platinum) with automated point accumulation, tier progression, and scheduled voucher distribution
- Built role-based dashboards (Owner, Employee, Member) with real-time fish stock monitoring, low-stock alerts, and revenue trend analytics
- Implemented automated background tasks using Laravel Scheduler for voucher distribution and session auto-checkout
- Delivered financial reporting (daily, weekly, monthly) with Excel export and secured access via role-based authentication

Vehicle Booking System

Apr 2026

Fullstack Developer (Technical Test)

Tech: React, CodeIgniter 4, MySQL

- Built a 2-level sequential approval system with strict validation and self-approval prevention to ensure controlled and auditable booking authorization
- Implemented manual JWT authentication (without external libraries), handling token generation, validation, and route-level middleware for secure API access

- Developed vehicle and driver overlap detection to prevent scheduling conflicts across concurrent bookings
- Built an analytics dashboard with bar, donut, and horizontal bar charts to monitor booking trends and vehicle utilization
- Implemented centralized activity logging across booking, approval, and master data operations for full audit traceability
- Delivered periodic booking reports with flexible date-range filtering and Excel export using PhpSpreadsheet

Personal Portfolio Web App

Jul 2025 – Present

Fullstack Developer

Tech: Next.js 15, TypeScript, Supabase

- Built a CMS-driven portfolio with an admin panel to manage projects, experiences, and skills using Supabase PostgreSQL with Row Level Security.
- Implemented a secure file upload pipeline to Supabase Storage with server-side validation.
- Developed an AI-powered chat assistant with streaming responses and rate limiting to handle user interaction reliably.
- Designed a responsive and accessible UI with dark/light mode using shadcn/ui and Tailwind CSS.

Organizational Experience

Information Systems Student Association, Jambi University

Dec 2024 - Nov 2025

Public Relations

- Managed internal and external communication to support organizational programs and activities
- Coordinated information dissemination through official media and social platforms
- Assisted in maintaining the organization's public image and stakeholder relationships.

EDUCATION

Bachelor of Information Systems

Aug 2022 – Present

Jambi University

GPA 3.72 of 4.00

SKILLS

- Languages: JavaScript, TypeScript, PHP, Python
- Frontend: React, Next.js, Tailwind CSS, React Native
- Backend: Laravel, CodeIgniter 4, Node.js (Express), REST API
- Database: MySQL, PostgreSQL (Supabase)
- Tools: Git, Postman, Figma.
